Mass Mountain Alpine Series™

High Performance Storage Solutions

Storage & Backup for Virtual Environments

The Mass Mountain Alpine Series gives customers a competitive advantage, delivering industry defying affordable market-leading storage solutions for enterprise level organizations. Petabyte scale, cutting-edge performance and security, software defined and certified to VMWare Ready™ Storage.

HCI Virtualized Networking Made Simple

Mass Mountain's hyper-converged capable infrastructure offers the highest value and quality to your mission critical operations with quick and easy implementation and ease of use.

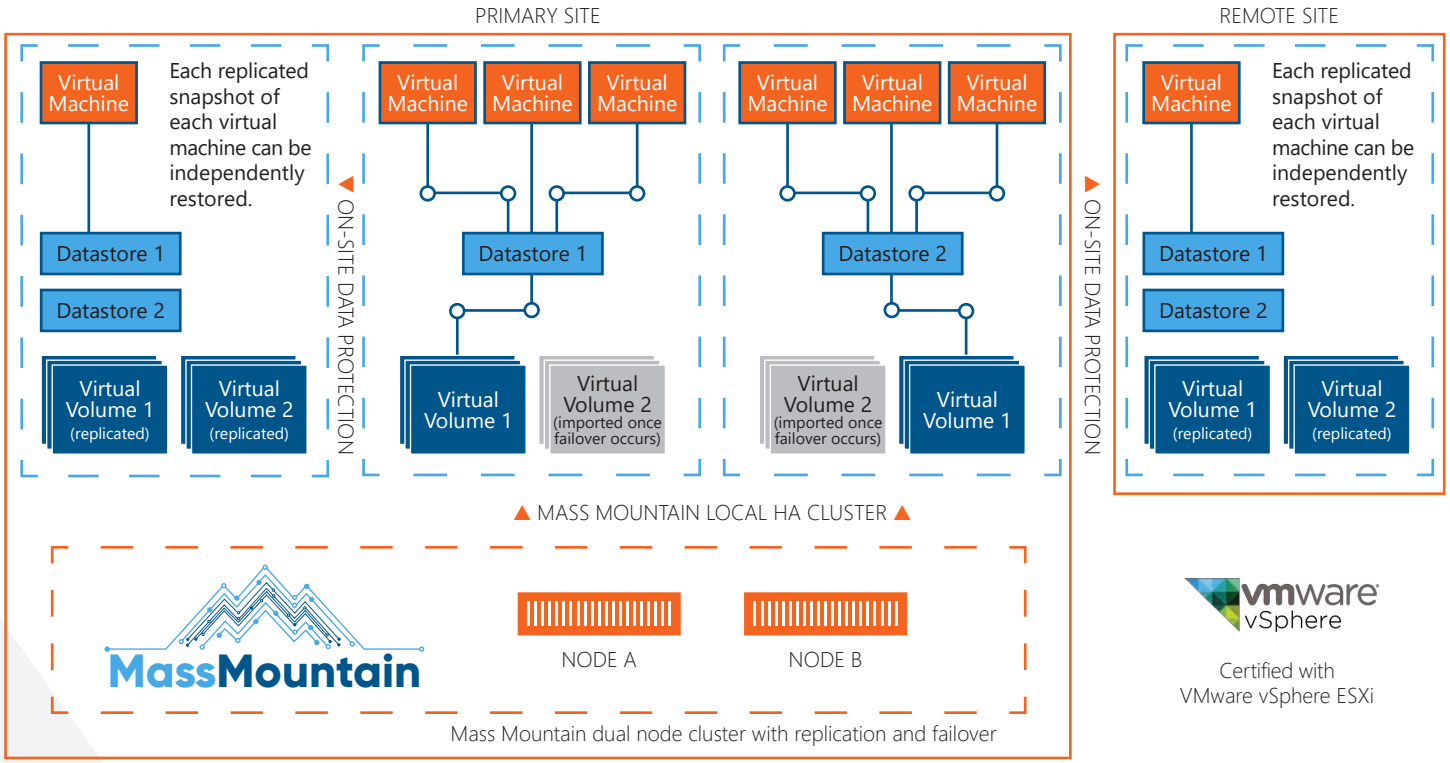
High Performing, Affordable Storage Configuration

DATA PROTECTION FEATURES	The Mass Mountain JDSS Data Protection Platform will continuously backup your organization's complete virtual data set efficiently, including only your modified data. The extensive snapshot feature ensures your mission critical storage is impervious to Ransomware attacks while enabling your previous versions to be accessed and restored quickly. Your highly available and secure network is guaranteed with a feature for data backup to multiple nodes anywhere in the world.
EASILY SCALABLE	VMware Ready™ Storage certification that's scalable to multiple Petabytes.
METRO CLUSTER	Our Metro Cluster seamlessly supports your system's replication and failover backup operation between cluster nodes up to 50 miles away.
HIGH-AVAILABILITY CLUSTER	Our data storage software allows your company the functionality of 'on and off site' data protection, including the high availability Metro Cluster features.
STORAGE & BACKUP ALLIANCE	Mass Mountain's storage and backup solutions provides a consistent network with reliable data backup for any virtual or onsite machines and data. The benefit of reduced costs and scalable solutions with lowered RPO (Recovery Point Objective).
EFFICIENT IMPLEMENTATION	Simple steps to connection with accelerated installation storage for VMWare VSphere ESXi solutions.
STORAGE VIRTUAL APPLIANCE (SVA)	Can be implemented as a stand-alone data storage server or as Storage Virtual Appliance (SVA).
STORAGE ADMIN PROGRAM	Intuitive WebGUI simplifies storage administration.
WORLD CLASS SUPPORT	Premium level technical support, performance evaluation, analytical reports and exceptional service provided to all of our valued customers for the complete storage setup including VMware implementation. 24X7 Remote and Onsite Options.

Solutions That Defy Industry Standards: 10X power @ half the storage cost

Mass Mountain Alpine Series™
High Performance Storage Solutions

Two-Node Hyper-Converged Solution with On and Off-Site Data Protection



Mass Mountain dual node cluster with replication and failover

vmware vSphere

Certified with VMware vSphere ESXi

Storage and Backup for Virtual Environments

The Mass Mountain Data Storage Solutions are designed especially for enterprise-sized Software Defined Storage environments and is Certified to VMWARE Ready Storage. Combined with VMware vSphere ESXi, it is a cost-effective, flexible and scalable solution for virtualization that offers highest performance and data efficiency. Mass Mountain based virtualized storage setups with High Availability and/or a sophisticated Hyper-converged Infrastructure offering the best value and quality due to:

- **Hyper-Converged Capable**
- Fast implementation and ease of use.
- Cost-effectiveness.
- VMware Ready™ Storage certification.
- Customers experience reliability, expandability, and bulit-in data protection.
